DAVID DAI

Graduate — Software Engineering | Data & Analytics | Solution Delivery

daviddaicareer@gmail.com | 0412 766 030 | Melbourne, VIC | Australian Citizen | Available from December 2026
david-portfolio-web.vercel.app | linkedin.com/in/david-dai-974ab5313 | github.com/ddai0008

PROFESSIONAL SUMMARY

Monash Business and IT double-degree student (GPA 3.70/4.0, WAM 82.1), graduating November 2026. Team Lead and sole client liaison for a six-person capstone team delivering a full-stack web application with real-time collaboration (Yjs CRDT) to a live commercial client. Former Business Analyst intern who built Power BI reporting and a Power Query matching pipeline across ~30,000 donor records. Seeking a graduate role in software engineering, data/analytics or solution delivery.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, HTML/CSS | Working knowledge: Java, Python, Swift, Kotlin
Frameworks & APIs	React, Next.js, CakePHP (MVC), REST APIs, WebSocket, Yjs (CRDT), Google Gemini API, Google Maps / Places API
Data & Cloud	PostgreSQL, MySQL, Microsoft Azure, Power BI, Power Query (M), DAX, Microsoft Dynamics (working knowledge), R and Stata (econometrics and statistics coursework)
Practices	Object-oriented programming, Agile/Scrum, Git, secure coding (Software Security, HD), requirements gathering, backlog and acceptance criteria, stakeholder engagement, technical documentation, Figma, Lucidchart
Credentials	Microsoft Certified: Azure Data Fundamentals (DP-900) | English, Mandarin (fluent)

EDUCATION

Bachelor of Business and Bachelor of Information Technology — Expected Nov 2026
Monash University | GPA 3.70/4.0 | WAM 82.1

Majors	Software Development; Business Analytics & Statistics
High Distinction	Data & analytics: Predictive Analytics & Machine Learning; Data Visualisation & Analytics; Business Forecasting; Statistical Foundations of Business Analytics; Introductory Econometrics (90); Data Analysis in Business (91) Software & IT: iOS App Development (95); Software Security (84); Web Database Interface; Mobile Application Development; Programming Fundamentals in Java; Industry Placement (89)
In progress	Industry Experience Studio Project 2 (capstone) and Applied Econometrics, completing November 2026

PROFESSIONAL EXPERIENCE

Team Lead, Client Liaison & Developer — Industry Capstone — Aug 2026 – Present
Monash University | Client: Agencia Change (change management consultancy) | Melbourne, VIC

- Developer (one of two) on a full-stack web application built in CakePHP (PHP, MVC) over MySQL and deployed to production on cPanel hosting for a live commercial client.
- Implemented real-time collaborative editing with Yjs (CRDT) over WebSocket, so several client users can edit one form at once without conflicts or lock contention.
- Implemented form version control (operation logging, snapshotting and version restore), so client staff can recover any earlier state of a form instead of losing work to an overwrite.
- Lead a six-person cross-functional agile team (2 developers, 2 cyber security, 2 business analysts) through sprint planning, stand-ups, reviews and retrospectives, sequencing security and analysis work into the delivery plan.
- Act as sole client liaison: run requirements and demonstration sessions, turn business needs into a prioritised backlog with acceptance criteria, and renegotiate scope when constraints shift.
- Own the technical documentation and handover pack so the client can operate and extend the product after the engagement.

Junior Business Analyst Intern — St Vincent de Paul Society
Mar 2026 – May 2026

Box Hill, VIC

- Ran requirements sessions with Treasury, Philanthropy and Fundraising stakeholders and built Power BI dashboards over Microsoft Dynamics data, retiring a manual extract-clean-visualise cycle of 1–2 hours per reporting round.
- Delivered beyond the brief: the Fundraising team adopted the dashboards for weekly catch-ups, removing duplicate reporting across two teams.
- Identified an unscoped data-integrity problem and built a reusable Power Query fuzzy-matching pipeline across ~30,000 donor records, validated at 100% precision on a random 100-record audit.
- Replaced a manual process of 1+ business day per pass with automated flagging; documented the logic for reuse and recommended human review of final merge decisions on sensitive donor data.

Retail Sales Associate — Vodafone
Dec 2024 – Apr 2025

Doncaster East, VIC

- Diagnosed and resolved iOS/Android hardware, network and account issues at first contact during high-volume shifts, reducing escalations to technical specialists.
- Managed customer data and contract logistics across the sales lifecycle; store ranked top 5 for customer satisfaction across Melbourne's eastern region.

Crew Member — McDonald's
Dec 2022 – Jul 2023

Doncaster East, VIC

- Worked high-volume shifts under time pressure alongside full-time study: punctuality, handover discipline and shift ownership.

TECHNICAL PROJECTS

ProBudget — Production Full-Stack Financial Application
Next.js 15, React, TypeScript, Tailwind CSS, PostgreSQL on Microsoft Azure, Vercel

- Architected, built and deployed a live application (pro-budget.vercel.app) for managing recurring subscriptions and visualising budget trends, with a responsive dark-mode UI.
- Designed the PostgreSQL schema and indexing strategy for efficient transaction retrieval as data grows, then planned and executed the cutover of the production database to Microsoft Azure.

MyMichlin — iOS Restaurant Discovery App
Swift, UIKit, MVC, MapKit, Google Maps SDK, Google Places API, Gemini API

- Built an AI-powered recommendation engine on the Google Gemini API, integrating Google Maps SDK, Places API and MapKit via async Swift for live restaurant data and custom map annotations.
- Graded 95% (High Distinction) for UI design, code quality and technical implementation.

Nutrition Tracking App — Android
Kotlin, Jetpack Compose, Room Database, Gemini API, MVVM, Figma

- Delivered a Gemini-powered dietary analysis feature with offline-first Room persistence, and designed a Material Design UI in Figma scoped through simulated client requirement-gathering sessions.
- Graded High Distinction for functionality, structure and clean MVVM architecture.

LEADERSHIP & VOLUNTEERING

Student Ambassador — Monash University Open Day
Aug 2026

Clayton, VIC

- Represented the University to prospective students and families, answering unscripted questions on majors and pathways across the IT and Business degrees and adapting explanations for school leavers, parents and international families.
